"Table-Tree"

"Table Trees" - alluring variety on the table

For the presentation of filigree delicacies on a minimum of space, the new "Table Trees" from Zieher offer numerous options for stylish staging.

On the six organically shaped leaves of the "Flower - Table Tree", dessert variants, an intermediate course or a little amuse-bouche for one or more guests can be presented. Even a selection of fruit, pastry or pralines can be attractively served.

The "Pin - Table Tree" provides surprising moments, offering the opportunity to serve finger food or small snacks on six skewers at different heights. Melon with ham, dates wrapped in bacon or tastefully filled parmesan baskets and edible flowers find an attractive place on the elegant branches. Every delicacy is held securely by an artfully shaped spiral and prevented from slipping.

Using solely stainless steel, the 30 cm high "Table Trees" are completely handcrafted and polished to a high gloss. The solid pedestal forms the basis of these filigree products and ensures a firm stand.

The trees can also be used on the buffet and are a nice addition to the larger exemplars of the "Flower-Tree" family. These are available in two versions and offer with up to 72 cm high, 13 or 25 levels for the presentation of culinary delights (main catalogue, page 90/91).

The mini cloches items 4982... are available in our main catalogue on page 174

The cloche item 4852 and the matching coaster made from walnut wood item 4734.03 are available in our main catalogue on page 177

"Doppio" - how about a little extra?

In the "Doppio" decanter, wine is given a double stage that attracts attention and provides surprising effects.

The geometric silhouette and the reduced design appears almost technical and directs the view to the inside, because the whole secret of this extraordinary design only discloses in filled condition.

Attractive visual effects appear already during the pouring process when the wine is divided onto both levels of the "Doppio" decanter. It almost seems that the wine is levitating.

In addition to the natural flow of the wine, which pours over the inside of the decanter onto the two levels, the division into two levels also has an extremely beneficial effect on the development of the wine. The splitting creates a significantly larger surface of the wine with a comparatively small space requirement on the table, which maximises the possible oxygen contact. The division also remains when pouring out, so that the cascaded flow creates a waterfall effect, which additionally increases aeration through swirling.

"Doppio" is elaborately handcrafted from high quality borosilicate glass, which is robust and easy to clean. The ideal charge of the decanter is 0.75 litres in order to generate maximum oxygen contact and the most beautiful optical effects.

decanter/carafe "Doppio"

borosilicate glass, transparent, handblown
